Isn't it very similar to the way insurance companies or banks evaluate the risk/return of potential customers? If the recognition model is built correctly (i.e. by someone with domain knowledge, not as a black box), I would expect that, on average, pattern recognition will provide some useful info.

The problem with investing based on pattern recognition ...

Kevin Roose / @kevinroose: The thing about the Trump Facebook bias survey is it's just going to be used to assemble a voter file, which Trump will then pay Facebook millions of dollars to target with ads about how biased Facebook is.
