Circulatory System Modern Biology Study Guide Answer

Circulatory System Modern Biology Study Guide Answer Answer and Explanation: The main function of the circulatory system is to transport oxygen and nutrients throughout the body to and from the cells.Circulatory System Modern Biology Study Guide Answer The lymphatic system is important for

Circulatory System Modern Biology Study Guide Answer

Answer and Explanation: The main function of the circulatory system is to transport oxygen and nutrients throughout the body to and from the cells. The arteries carry the oxygen and nutrient-rich blood away from the heart to the cells while the veins return the blood back to the heart to become reoxygenated and nutrient-rich.

What is the main function of the circulatory system ...

The lymphatic system is important for the normal function of the body because it. a. carries newly formed blood to the cardiovascular system. b. returns excess intercellular fluid to the cardiovascular system. c. provides an alternate route for blood during strenuous exercise. d. carries oxygen to the lymph nodes.

EW THE CIRCULATORY SYSTEM - eaisbio

Human Circulatory System. The heart pumps the blood throughout the body. The lymphatic system is an extension of the human circulatory system that includes cell-mediated and antibody-mediated immune systems. The components of the human circulatory system include the heart, blood, red and white blood cells, platelets, and the lymphatic system.

Unit: Biology C - Circulation Science 21 Bio C - Circulation B46 LESSON 1.1 - AN INTRODUCTION TO THE CIRCULATORY SYSTEM Overview: Students will read about the circulatory system and answer probing questions to test their ... Study Figure B, then answer the questions.

AN INTRODUCTION TO THE CIRCULATORY SYSTEM - horizonsd.ca

The circulatory system serves to move blood to a site or sites where it can be oxygenated, and where wastes can be disposed. Circulation then serves to bring newly oxygenated blood to the tissues of the body. As oxygen and other chemicals diffuse out of the blood cells and into the fluid surrounding the cells of the body's tissues, waste products diffuse into the blood cells to be carried away.
