### **Fish Neurobiology Volume 1 V**

Cuttlefish, like other cephalopods, have sophisticated eyes. The organogenesis and the final structure of the cephalopod eye fundamentally differ from those of vertebrates such as humans. Superficial similarities between cephalopod and vertebrate eyes are thought to be examples of convergent evolution. The cuttlefish pupil is a smoothly curving W-shape.

Neuroscience and intelligence refers to the various neurological factors that are partly responsible for the variation of intelligence within a species or between different species. A large amount of research in this area has been focused on the neural basis of human intelligence. Historic approaches to study the neuroscience of intelligence consisted of correlating external head parameters ...

1. Introduction. The extent to which anthropogenic noise in the world's oceans impacts marine fauna is a subject of growing concern (Slabbekoorn et al., 2010, Azzellino et al., 2011, Williams et al., 2015). Sources of marine anthropogenic noise include high-intensity acute sounds produced by activities such as military exercises (Dolman et al., 2009), oil and gas exploration (McCauley et al ...

Goin' Ham on Haim. These two pieces — one by Grantland, the other by whatever Collapse Board is — are both trying to untangle each writer's own impossible knots about "pop product" and "indie rock" and "ambition." It's the old "rockism" vs. "popism" debate retrofitted for the think-piece era's narcissism of small differences.
