Multiplication - AAA Math

To multiply decimals, first multiply as if there is no decimal. Next, count the number of digits after the decimal in each factor. Finally, put the same number of digits behind the decimal in the product. For example, if we multiply 7.61 9.2, we will have 3 digits behind the decimal in our product because there are 3 digits behind the decimals in the factors.

Multiplying decimals example (video) | Khan Academy

The Egyptian method of multiplication of integers and fractions, documented in the Ahmes Papyrus, was by successive additions and doubling. For instance, to find the product of 13 and 21 one had to double 21 three times, obtaining $2 \times 21 = 42$, $4 \times 21 = 2 \times 42 = 84$, $8 \times 21 = 2 \times 84 = 168$. The full product could then be found by adding the appropriate terms found in the doubling sequence:
