IQS Directory is a top industrial directory listing of leading industrial automation equipment manufacturers and suppliers. Access our comprehensive index to review and source automation equipment manufacturers with preview ads and detailed product descriptions.

Automation Equipment Manufacturers Suppliers | IQS Directory

An assembly line is a manufacturing process (often called a progressive assembly) in which parts (usually interchangeable parts) are added as the semi-finished assembly moves from workstation to workstation where the parts are added in sequence until the final assembly is produced. By mechanically moving the parts to the assembly work and moving the semi-finished assembly from work station to ...

The assembly line has long been considered one of the greatest innovations of the 20th century. It has shaped the industrial world so strongly that businesses that did not adopt the practice soon became extinct, and it was one of the key factors that helped integrate the automobile into American society.

The evolution of assembly lines: A brief history | Robohub

INTRODUCTION. In our globally-linked economy, product development capabilities are the basis for successful competition. Successful product development requires fundamentally improved approaches to organizing the development process, reducing waste, and providing products to meet customer needs in order to respond to global competition in our own markets as well as compete effectively on a ...

A Strategic Approach to Product and Process Development

As many organizations move to build their automation capabilities, recent survey results suggest that certain best practices will differentiate successful efforts from others. Not surprisingly, the high-tech and telecom industries are leading the way on automation. Three-quarters of respondents in ...

The imperative to automate business processes | McKinsey

At Prestech, we work towards a prominence on ensuring our customers, that tasks of designing, specifying, purchasing, installing and maintaining our profile building systems is made as simple as

possible, with ultimate lower cost ownership and maximum investment returns.

Prestech Industrial Automation Pte. Ltd.

Welcome to Lian Innovative Lian Innovative is a product design and development company who is a specialist in the high-tech product, embedded systems design, and industrial automation. We have dedicated to design and development products that delight users and achieve market success. Transforming client ideas, needs, and challenges into innovative marketable products and successful brands fuels ...

The existing problems and defects of the construction sector can be successfully addressed by future CA. An overlay of S-curves can be used to describe the relation between the stagnation and technical limits of one technology (conventional construction) and the initiation, development and growth of new strategies and technologies (future CA), which are at the beginning inferior to the ...

The future of construction automation: Technological ...

Today, yoga is no longer something that's only practiced by Buddhist monks or Hindu spiritualists. There's flow yoga, hot yoga and power yoga. There's even broga (yoga for men) and doga (yoga for people with dogs). Many assembly lines also have something in common with yoga: Flexibility. It's the key to "tree," "warrior" and other types of yoga poses.

Mixed-Model Assembly Is Key to Profitability | 2016-05-05 ...

Our passion is people, and our mission is to unite Fortune 1000 CXOs and visionary leaders who share a common purpose and a collective thirst for progress. By fostering collaborative exchange in a secure platform, Apex Assembly brings to the forefront strategic concepts and actionable insights.

Integrated Companies – Extensive Resources FMG is an integrated group of companies dedicated to the development and manufacturing of medical devices and diagnostics, and the support of related independent companies in similar fields through direct investments, investments through our Venture Capital Fund and providing operational support.

Frantz Medical - Quality For Life

3D parts and assembly modeling is the CAD technique through which the design intent of a part or assembly is accurately and unambiguously described by a 3D virtual model, an almost tangible representation of physical reality. Before computer-aided design (CAD) software, highly trained mechanical ...

Parts and Assembly Modeling | PTC

Cables can be an essential component, even a lifeline, to electronic systems. If a cable goes down, the entire system can fail. With four critical factors impacting their performance — mechanical, electrical, environmental and application-specific — manufacturers have to make sure cables can survive severe conditions and perform reliably over the system's lifespan.
